“

“To be rendered powerless does not destroy your humanity. Your resilience is your humanity. The only people who lose their humanity are those who believe they have the right to render another human being powerless. They are the weak. To yield and not break, that is incredible strength.”

**Hannah Gadsby - Australian comedian**

Powerful words that epitomize the spirit of those who face unrelenting peril at the hands of those who are hell-bent on silencing their voices, their very existence. The resilience of the Palestinians, in face of genocide at the hands of The Israel's armed forces and supported by the America, Britain, France, Germany, and other Western countries, expose's the hypocrisy of these so-called champions of human-rights and freedom. The past couple of weeks has seen widespread student protests across dozens of American University campuses against the slaughter of the Palestinians. Thousands of peaceful demonstrating students have been arrested by brutal use of force. The failure of the Muslim countries to adopt measures to punish Israel, is just pathetic. Over 1.2 billion Muslims have watched as silent spectators because their Governments don't want to compromise relations with these Imperialist powers, while the inhabitants of Gaza starve, and 'Ethnic Cleansing' continues unabated. We should all hang our heads in Shame!
