5. Zero Tolerance on Unfair Means.
6. Preschool 3rd PTM – 30th August 2025.
7. New Members – Selection of Student Council.
8. STEAM Classes for 1 to 8 (After 2nd Term Exam)

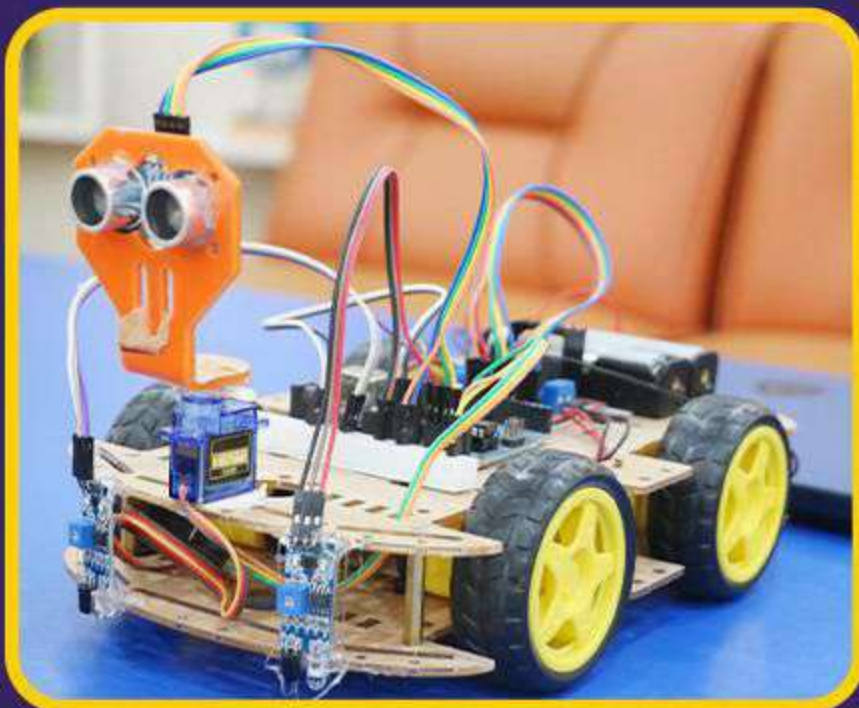

THE LITTLE

ROBOT OZAN

In a small town, there was a tiny robot named Ozan. He could walk, talk, and count, but he felt something was missing. One day, he asked a little girl, “Can you teach me how to be kind?”

The girl smiled and said, “Kindness isn’t in books or machines. It’s in helping others.

From that day, Ozan started opening doors for people, carrying bags for elders, and sharing toys with children. Everyone loved him, not because he was a smart robot, but because he had learned the most powerful skill of all, kindness.

SAP PUNCTUALITY & REGULARITY

At our school, we believe discipline begins with the simple values of punctuality and regularity. Students are encouraged to arrive on time, ensuring they begin their day with a fresh and focused mindset. This habit not only helps them academically but also instills life-long values of responsibility and respect for time.

Parents also play a vital role in reinforcing these values at home. We encourage families to maintain a consistent daily routine for their children, ensuring they come to school on time, well-prepared, and ready to learn. Together, we can build a strong foundation for discipline and excellence.

DATE SHEET ALREADY SHARED WITH PARENTS

We are pleased to inform you that the date sheet for the upcoming exams has already been shared with parents. This early communication allows families to prepare their children in an organized and stress-free manner.

Our goal is to ensure students have ample time to revise their lessons and develop a balanced study plan. We encourage parents to work with their children, set daily targets, and provide an environment conducive to learning at home.

PTM FEEDBACK **CLASSES 1 TO 10**

The recent Parent-Teacher Meeting (PTM) for classes 1 to 10 proved to be a highly constructive platform. Teachers and parents had detailed discussions on each child's progress, strengths, and areas for improvement.

This feedback is invaluable as it helps us tailor our teaching methods to the individual needs of our students. Our dedicated staff is committed to implementing new strategies based on the feedback received, ensuring no student is left behind.

ZERO TOLERANCE ON UNFAIR MEANS

Academic honesty is one of our school's strongest values. We uphold a strict zero-tolerance policy against unfair means during examinations and assessments. Integrity in academics builds the foundation for integrity in life.

Students are constantly reminded that true achievement comes only through hard work and dedication. Cheating or dishonesty not only harms individual growth but also undermines the values of the entire school community.

We request parents to reinforce this message at home by motivating children to prepare sincerely for their exams.

Together, we can raise a generation that values honesty over shortcuts.

PRESCHOOL 3RD PTM

30TH AUGUST 2025

We are delighted to announce the 3rd PTM for Preschool, scheduled on 30th August 2025. This meeting will focus on the early development stages of our youngest learners, ensuring a strong start to their educational journey.

Preschool is the foundation upon which all future learning is built. Parents will receive detailed insights into their child's progress in social, emotional, and academic skills. Teachers will also provide suggestions on how parents can support their child's learning at home.

NEW MEMBERS

SELECTION OF STUDENT COUNCIL

Leadership is a skill best developed through opportunity. We are excited to announce that the selection of new student council members will take place this week.

The student council provides a platform for students to learn teamwork, responsibility, and decision-making. Through this body, students gain confidence in voicing their opinions and contributing positively to school life.

We encourage all students to take part actively in this process. Whether selected or not, every participant learns the value of leadership, participation, and fair competition.

STEAM CLASSES

FOR 1 TO 8 (AFTER 2ND TERM EXAM)

We are thrilled to share that STEAM (Science, Technology, Engineering, Arts, and Mathematics) classes for grades 1 to 8 will commence after the 2nd term exams.

STEAM education is at the heart of 21st-century learning. These classes will encourage students to think critically, solve problems creatively, and work collaboratively on hands-on projects. This approach moves beyond rote learning, preparing students for future challenges in an ever-changing world.

Parents are encouraged to support their children's curiosity by discussing what they learn in STEAM classes at home.

Together, we will nurture innovators, creators, and problem-solvers of tomorrow.
