# UPCOMING EVENT

## ETE (ECO TREK EXPLORATION & SPORTS ACTIVITIES)

We are excited to announce that on 25th September, our students will participate in ETE (Eco Trek Exploration & Sports Activities). This special program is designed to connect children with nature while encouraging them to explore and learn about the environment around them. Activities will include exploring trees, wild flowers, birds, and insects, along with thought-provoking documentaries and interactive awareness sessions.

The event will also focus on promoting teamwork, mental well-being, and physical health. Students will enjoy hiking, sports, and a nature walk while also engaging in meaningful activities like recycling drives, eco-friendly product creation, water conservation projects, and volunteer work including food distribution. ETE promises to be a day filled with adventure, learning, and values that inspire a healthy lifestyle.

# **SIBLING** **ADMISSIONS**

**SESSION 2026**

We are pleased to inform you that admissions for siblings of our current students will open in October 2025. This provides families with the opportunity to secure a place for their children in advance and continue their educational journey with us. Since our admissions are highly sought after, we always prioritize existing families through this exclusive sibling intake.

Please note, however, that seats will be limited and offered strictly on a first-come, first-served basis. We encourage parents to complete the process early to avoid disappointment. Details regarding registration and formal requirements will be shared in due course, but we recommend that interested families begin preparing the necessary documents now.

# DUES DEADLINE

Dues must be cleared on or before the 6th of every month.

# AITCHISON COLLEGE

## SCIENCE AND ENGINEERING CONCEPT (ACSEC X)

This year's edition carries even greater significance as it also hosts the national selection test for the International Olympiad of Artificial Intelligence. This unique opportunity allows our students to potentially represent Pakistan on the global stage, placing them among the world's future innovators. We wholeheartedly congratulate our delegation for being chosen and extend our very best wishes as they embark on this remarkable journey of learning, discovery, and achievement.

## **SCIENCE AND ENGINEERING CONCEPT (ACSEC X)**

We are immensely proud to announce that 14 of our students have been selected to represent our school at the 10th edition of the Aitchison College Science and Engineering Concept, ACSEC. This prestigious event brings together some of the brightest young minds from across the country to compete in a wide range of STEM-based challenges. With fifteen sub-events in total covering disciplines like Engineering, Mathematics, Biomedicine, and Astronomy, ACSEC is widely regarded as one of the leading academic platforms in Pakistan.

Among these sub-events, three namely the Robinson Challenge, Fibonacci's Trials, and Langland Research Prize are compulsory, ensuring that students are tested in both analytical and creative problem-solving. Beyond these, students have the chance to showcase their skills across twelve other competitions that emphasize innovation, critical thinking, and teamwork. This experience will not only broaden their intellectual horizons but also foster confidence and leadership qualities that will benefit them in every aspect of life.
